

Now! APPROVED BY THE CAA!

The CIVIL AERONAUTICS ADMINISTRATION Has Issued TYPE CERTIFICATE No. 1-G-1 to

THE SCHWEIZER 1-23

Now you can fly an Approved Class 1 High-Performance Sailplane!

Thrill to the smoothest soaring you've ever enjoyed! Fly the 1-23! Modern in every respect, and built on an efficient production-line basis, this sleek, super-performing, all-metal ship features complete interchangeability of parts. Built into the 1-23 is plenty of that extra sturdiness, typical of all Schweizer craft.

Watch for more records to fall as additional 1-23's take to the air!

As more of these sailplanes are built, additional outstanding flights are being made. . . . Just the other day, a 1-23 was taken up to over 30,000 feet, where temperatures of 40 below zero were encountered. . . . A record goal flight and record speed flights already have brought to the 1-23 enthusiastic acclaim. . . . East, West, North, South—wherever this sailplane is flown—the 1-23 has earned the distinction of being named TODAY'S OUTSTANDING AMERICAN SAILPLANE.

Now is the time to climb onto the bandwagon!

Get your name on the fast-growing order list of pilots purchasing 1-23's. . . . For Summer 1950 delivery, immediate action is suggested. . . . Orders are filled in the sequence in which they are received at the factory.

Want more information? Shoot along your questions and they'll be answered promptly.
