

MAKE YOUR AIM

BUILD-IT-YOURSELF

A worthy target that is within your range — the 1-26 sailplane kit — low priced, easy to build, easy to fly, and yet with performance to spare. Just the thing for you, your friends, and your club.

Put your sights on a 1-26 "One Design Class" Association for your area by banding together with other 1-26 purchasers. It speeds up the building of the kit and makes week-end soaring much more interesting and fun. It also makes possible area and regional "regattas." Write in for information on this "one design class" association idea.

Shoot for a 1-26, either in kit or complete form by writing in for special order and agreement form. Popular acceptance of the 1-26 has resulted in a steadily growing order list, so if you want one for next year you should act now.

For complete details on the 1-26, the 1-23D, and our other gliding supplies and equipment, write to:
