

Why Buy **SCHWEIZER** SAILPLANES?

With sailplanes available from foreign countries, here are the reasons why you should get an American-built **SCHWEIZER SAILPLANE**

LOWEST PRICE—In the Long Run

Initial price is not the only factor to consider. Rapid depreciation, high maintenance cost and lower resale value can quickly eliminate savings due to lower initial cost. SCHWEIZER'S proved all-metal construction result in lowest overall cost.

MAXIMUM SAFETY—Reserve Strength for Maximum Pilot Protection

Most Pilots fly for fun and so welcome the sturdy design and justified feeling of security and peace of mind that go with a SCHWEIZER product. The 1-26, 1-23, and 2-22 series of sailplanes have unsurpassed safety records with tens of thousands of hours flying and never a fatality.

NATIONWIDE SERVICE—No Non-Standard Parts or Metric Sizes

All SCHWEIZER products use standard American hardware and parts eliminating expensive spare parts or drawn out delivery. Available interchangeable parts, plus growing dealer service assure you a minimum of down-time.

BEST "TOTAL PERFORMANCE"

Designed to our "Total Performance" concept, overall results are stressed rather than particular performance features. Features such as **trouble free operation, pilot confidence, and comfortable cockpit** are important points to consider.

ONLY FAA APPROVED—Kits and Semi-Completed Sailplanes

SCHWEIZER'S ATC'd sailplanes are engineered, tested, and produced to rigid FAA requirements. Available in various forms of government approved kits, SCHWEIZER brings sailplanes to you at the lowest cost. Our pay-as-you-go unit plan makes it possible for you to own sailplanes on a low budget basis.

NO HIDDEN COSTS

There are no duties, lighterage fees, brokerage or other unexpected costs when you buy your SCHWEIZER SAILPLANE.

Consider these factors when you are thinking of a new sailplane and you will decide on a SCHWEIZER. Join the steadily growing list of satisfied SCHWEIZER owners.
