

THE SCHWEIZER 1-23 "H" IS HERE!

NOW ATC'D

Here are the latest versions of the Schweizer 1-23 — the new "H" Models are the latest addition to this series of world famous sailplanes.

New Schweizer 1-23H

The long span 1-23 featuring limiting speed dive brakes and higher placard speeds.

New Schweizer 1-23H-15

The 15 meter international standard class version. This sailplane will be competing in the World's Gliding Championships this June. Can be converted to an "H" by the addition of wing tip extensions.

Here are the worthy successors to the many other popular 1-23's designed to the Schweizer "total performance" concept and incorporating all the changes which were included in the "G" Model plus the new features listed above. These rugged, all-metal sailplanes have a design load factor of 9 positive and 6 negative. Production is underway and deliveries are being scheduled in the sequence in which orders are received. Contact us or your nearest Schweizer Dealer for full particulars.

SOARING HOLIDAY

Combine your vacation with Soaring Fun. Enroll in the Schweizer Soaring School in the beautiful Finger Lakes Region and get your FAA Glider Rating and "C" Soaring Award.
