

IT'S THE SCHWEIZER 1-23H AND THE NEW STANDARD CLASS H-15 — BOTH NOW FULLY ATC'D

Yes, from every viewpoint, the latest models of the famous Schweizer all-metal, high-performance sailplanes, offer outstanding values:

1. Total Performance Viewpoint: Joe Lincoln's recent 459 mile flight in his 1-23D bears out our "total performance concept." Designed for general rather than special conditions, they take into account all features which have a bearing on performance, safety, comfort, ease of handling, climbability, penetration, etc.
2. Lower Cost Viewpoint: A Schweizer all-metal sailplane means lower cost: With minimum depreciation and lower maintenance of the all-metal construction and highest resale value. A Schweizer sailplane is an investment, not an expense!
3. Safety Viewpoint: New limiting-speed dive-brakes plus the rugged all-metal construction and proven flying characteristics give maximum safety and pilot protection. A Schweizer 1-23 is low cost insurance.

KITS FOR WINTER PROJECTS

Now is the best time to take action and order your kit so you can be flying by next spring. The 1-23H is available in Final Assembly Kit, and the 1-26 and 2-22C are available in four types: Dry, Standard, Installment, and Uncovered Kits.
