SCHWEIZER 2-22C

Many outstanding flights are demonstrating the performance possibilities of the 2-22C, long recognized as the top American trainer. Al Parker's 176 Mi. in Texas, a Dayton Soaring Society Member's 180 Mi. flight in Ohio and * Al Parker's 196 Mi. Gold "C" flight in July show there is more performance in the 2-22 than "meets the eye." Enter the "Best Flight Contest." Discover the fun and challenge of cross-country soaring.

MORE STUDENTS SOLOED "Our 2-22's get more students in the air, with utmost safety and at lowest cost. High enough in performance so that our members can take their friends along for an hour or two any nice day." H. E. Ruble, President, Soaring Society of Dayton

THE BEST AND SAFEST "I wanted a ship that I could use for training my family and friends to soar. I have flown all types of two-place ships in the U.S. and have no doubt that the 2-22 is by a wide margin the best and safest for this purpose." Harner Selvidge, Past President S.S.A., Altadena, Calif.

INDISPENSABLE "The backbone of our Sky Sailing Operation is our 2-22C. Over 700 hours of hard usage has made it indispensable. The 2-22C and the 1-26 have made our commercial glider operation possible." Les Arnold, Hayward, Calif.

MEMO

There is still time to take a course
at Schweizer Soaring School.
Late Summer-Fall season runs until November.
Write for School Brochure.
