## RETIRED SAILPLANES

Falcon; N86430; Robert H. Moore and partners; Phoenix, Ariz.; destroyed by wind storm.

The SS-1, shown above, was designed and built by Arlen Moore of Sweet Home, Oregon. Mr. Moore built the all-metal ship in a shade under three years with the help of his wife and their 12-year-old son. The span is 48 ft., aspect ratio 20 and wing area 121 sq.ft. Empty the glider weighs 486 lbs. and at a maximum gross weight of 690 lbs. has a wing loading of 5.7 lbs./sq.ft. From comparison flights Mr. Moore estimates the glide ratio to be about 30 to 1. The SS-1 was first flown last June and had accumulated its 10 hours of FAA-required test time prior to the Labor Day meet at Wenatchee, Washington, where it was subsequently flown. Mr. Moore looks forward to distance attempts with the new ship in the spring.
