

HI-LO DELUXE DUAL SYSTEM

CONTINUOUS FLOW 0-30,000 ft.
PRESSURE-BREATHING DEMAND 0-45,000 ft.

Two systems for little more than the price of one! The specially modified regulator can be used with the light-weight #12 Mask as a continuous flow system with all the advantages of low consumption, mask comfort and a **completely automatic** regulator! No more twisting the knob as you change altitude — the regulator does it automatically and safely! Perfect for all flying up to 30,000 ft. Then, for the really high ones, use the A-13A Mask and you're instantly ready for record altitudes with the knowledge that nothing has been spared in the way of quality or engineering to provide you with the utmost in safety. The HI-LO DUAL contains everything necessary to install the system:

A14A (h.p.), Diluter Demand Pressure Breathing Regulator, specially modified for both automatic continuous flow and standard pressure breathing operation.

AN6029-1 Blinker, mounted on regulator (Blinker may be remotely mounted by using standard low-pressure lines and fittings if desired.)

P500B Gage, 0-3000 psi, new manufacture, and C800349 Gage Mounting Tee, installed on regulator.

ZS710 Line assembly, h.p. copper, hydro-tested and cleaned for oxygen use, 12", 24", 36", 48" or 60" standard. (Special lengths to order, add \$7.50 to system price.)

A-13A Mask, Positive Pressure Oxygen, new manufacture, complete with 48066 12" mask hose and MC-3A high altitude bailout adapter installed (Sizes: small, medium or large), less microphone.

AN6003 Tube Assembly, oxygen mask to regulator, with AN6002-1B Connector Assembly installed, lengths 12", 18", 24" or 36".

ZEP AERO #12 Continuous Flow Mask, soft silicone rubber, complete with rebreather bag, ZV852 flow indicator and 41A-2988 connector, less microphone.

1 Pair, Cylinder Mounting Brackets, quick change type, stainless steel bands, to fit selected cylinder.

Above system price when purchased with 22 Cu. Ft. or larger cylinder \$209.50

Add cylinder number and price (see below)

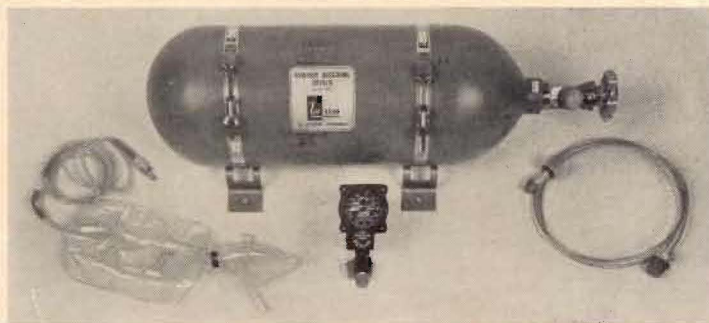

Total system cost with cylinder \$

CONTINUOUS FLOW SAILPLANE SYSTEMS 0-30,000 ft.,

These complete systems consist of an A8A regulator, fully overhauled with new factory parts, brand new cylinder filled with Aviators Breathing Oxygen, ZEP #7 mask with rebreather bag, tubing and fitting, cylinder mounting brackets, and made up high pressure line ZS821; everything necessary, ready to fly:

A200-22SY	22 cu. ft.	\$136.50
A200-38SY	38 cu. ft.	144.50
A200-48SY	48 cu. ft.	148.50

Add \$13.00 for dual outlet and additional mask.
Line lengths 12, 24, 36, 48, or 60 inches.
Special lengths add \$7.50.

HIGH PRESSURE OXYGEN CYLINDERS

STANDARD WEIGHT, 1270 PAC TYPE VALVE, ICC 3AA 1800 CYLINDER*

Part Number	Cu. Ft.	Length Incl. Valve	Diameter	Wt. Filled	Price
ZC268-11-7	11.0	22.50	3.56	7.4	52.25
ZC268-15-7	15.2	17.50	5.25	10.0	55.80
